

USA Gymnastics Stats of 2004

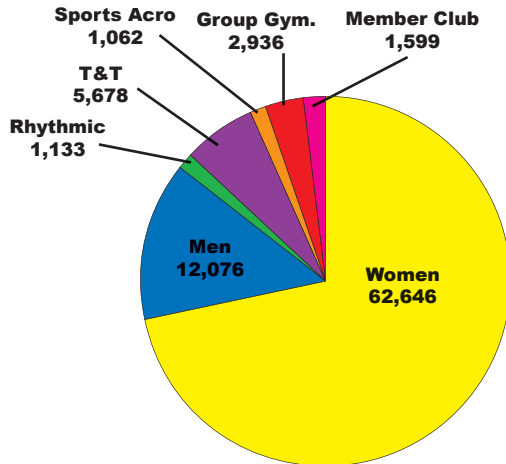

Have you ever wondered how many gymnasts actually compete at the elite level in your discipline? Have you ever wondered how many Level 5's or Level 10's there are in our country?

Below are charts with this information to answer some of your questions. These numbers were taken in August 2004, just prior to renewal time for our athlete members. The numbers represent all

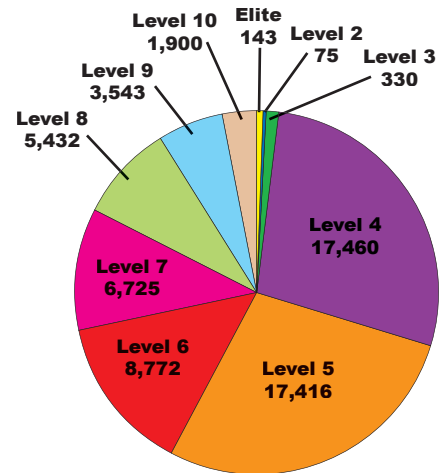

competitive members of USA Gymnastics in each discipline. This should give you a good idea of the competition you're up against in your discipline and level.

Remember, these numbers don't include all the kids who take classes in gymnastics each week. These numbers represent only those gymnasts who compete in USA Gymnastics competitions.
